

Information, Description Version2 REG13 + Filtering Information - Version 2 REG13

Information, description version2 REG13

REG13 works on Chrome Firefox and Edge browsers.

The REG13 has undergone changes in design and functionality, and here is a brief list of them:

1. PAGE: LIST OF WORKERS

- 1 preview page added - a clear list of workplaces has been added, where you can check the name, ID and address of your organization.
- On the first page, it is visible at first glance whether the holder has already been reported for the current month in the workplace - for quick information on whether a report is being submitted for the given month, the button at the bottom of the tile (green icon - report based, red cross icon - no report yet).
- When you click on the message list, a pop up window opens with the possibility of creating a report or statement. The report can be opened immediately by this window, or close it and report it later using the "Create report" button on the reporting list page.

2. PAGE: LIST OF MESSAGES AND LIST OF EXTRA REPAIRS

- The "Create Report - Non-Delivery Statement" button is visibly located above the main message table, and when it is pressed, the pop up window opens with the option of a report or a non-delivery statement so that the user does not have to search for small message and declaration icons ...
- Transparency of Message List - Message List drop-down list and Emergency Repair List.
- The status in which the current report is located is added to the list of messages and to the list of emergency corrections:

a) Reports list states:

Open - Report opened to report within 10 days of the month.

For editing - it is possible to change the report from 10 to 20 days of the month.

Closed - Reporting for the current month was closed.

b) Conditions for emergency reporting:

Open - An extra report has been created and is in edit state.

Submitted - an extraordinary report has been sent to SÚKL.

Approved - Extraordinary report was approved by SÚKL.

Disapproved - The extraordinary report was rejected by SÚKL.

- Each report and extraordinary repair has detailed information about the reports - the individual LPs are hidden in the detail of the report. For the details of the report you will get the icon of the blue pencil at the current month or the current

extraordinary correction: "Edit", on the right side of each message, use the icon |: "Preview" for older months.

- Instead of a clutter on the left, clear icons on the right: "Download Excel File, Create Extraordinary Repair, Edit, Preview".
- No new messages or declarations can be deleted in the new version of REG13.
- Changing the non-delivery statement and vice versa is automatically done in the new version (by removing all items, the user is automatically notified that the cancellation has changed from the statement to the declaration, and by adding the entries the user will be informed about the change from the statement to the message. statement and vice versa you can check in the column "Type", where "Reporting" is changed to "Statement".
- The list of reports as well as the list of extras includes the option to download the Excel file and the JSON file (for experts) with reports or extraordinary repairs.
- The list of extra patches contains a new possibility of previewing the contents of the extraordinary repair.
- The list of messages contains a new possibility of previewing the submitted and closed reports.
- Extraordinary fixes are included in the list of emergency fixes, but not yet completed.
- The status of emergency repairs is included directly with each emergency repair (approved, rejected, dispatched) and does not disappear, remains in the list of emergency fixes. Additionally, there is detailed information when the report was approved or rejected by SÚKL.
- The new version of REG13 changed the basic logic of creating an extraordinary repair - if the user is creating an extraordinary repair, his original report is copied to the emergency repair table, and the user can edit the patches comfortably and do not need to rewrite the extra repair items. After a complete repair of an extraordinary repair, the user only presses the button at the top of the screen: "Submit correction for approval".
- Added fulltext search, eg by period. The search works in both reports and extraordinary repairs.
- A clear page view and the ability to choose how many line items the user requires on the page.
- For each current month of reporting, an optional option has also been added to send a confirmation of the sent message to SÚKL via e-mail (this is the green envelope icon on the right side of the message) - a mail notification.

3. PAGE: REGISTERED LP

- Registered LP have their own page and icons on the right side for easier handling of items: "Delete, Edit, Open Product Detail".
- The "Add Medication" button is visibly located above the main table of registered LP.
- Each entered and stored item is automatically sent to SÚKL. Submission of individual items can be checked by the user in Excel table, which can be

downloaded for each message list.

- For each drug, it is also possible to view the detailed information by opening the arrow on the right side, it is possible to open all the details of the medicines by pressing the button at the top of the right side: "Open All" or "Close All".
- Added a full-text search, for example by LP name.
- A clear page view and the ability to choose how many line items the user requires on the page.

4. PAGE: REGISTERED LP FOR EXTRA REPAIRS

- The new version of REG13 changed the basic logic of creating an extraordinary repair - if the user is creating an extraordinary repair, his original report is copied to the emergency repair table, and the user can edit the patches comfortably and do not need to rewrite the extra repair items. After a complete repair of an extraordinary repair, the user only presses the button at the top of the screen: "Submit correction for approval".
- Exceptional repairs are performed by pressing the red key on the right side of the message and confirming the reasons for the repair, mail and telephone.
- Registered LPs in extraordinary repair have their own page and icons on the right side for easy handling of items: "Delete, Edit, Open Product Detail".
- The "Add Medication" button is visibly located above the main table of registered LPs.
- Exceptional repairs are not sent as per the items individually but after a complete repair with the button at the top: "Submit correction for approval". In this case, when an extraordinary repair is in the state: "Open", it is not possible to download the Excel spreadsheet for review until the table is closed by sending it to SUKL.
- It is also possible to view the detailed information for each drug in the emergency repair by opening the arrow on the right side, it is possible to open all the details of the medicines by pressing the button at the top of the right side: "Open All" or "Close All".
- Added a full-text search, for example by LP name.
- A clear page view and the ability to choose how many line items the user requires on the page.

Filter information - Version 2 REG13

REG13 filtering works on Chrome, Firefox, and Edge browsers.

Filtering takes place through the following items:

1. Page: List of messages

Looks over the period, both in the reporting list and in the list of emergency fixes:
(format eg 2017,2017 / 03, 03 / 2017,03,2017,11)

2. Page: Editing and Reading Registered LPs:

Search for Registered LP by: code (eg 0000077, 77), add-on (eg DRG 50X25MG, DRG 50, 20X1MG), name (eg ACYL, ACYLPY or ACYLPYRIN) and batch (eg A645B4, A64 ..).

Registered LP

* SUKL code

(format eg 0000077, 77)

*supplement

(format eg DRG 50X25MG, DRG 50, 20X1MG)

*name

(format eg ACYL, ACYLPY or ACYLPYRIN
ACYLPYRIN ...)

* batch

(format eg A645B4, A64 ..)
